

Information technology services

INHS Engage

California Critical Access Hospital Network (CAAHN) partners with **INHS Engage** for IT Shared Services. Per agreement with CAAHN, Engage brings services to members at a significant discount, leveraging the economies of scale in a true IT Shared Services model. Engage also offers other technical support functions including physician EMR. An approved MEDITECH Hardware Integrator, Engage brings 20+ years of experience operating MEDITECH to assist with system augments, upgrades, virtualization efforts, and data center migrations.

Engage does not resell hardware or software, but works with the individual facility's preferred reseller to insure the systems are consistent with MEDITECH's certified solutions and best practices.

Hardware Integration

- Design
- Installation
- Support
- Project management

Hosting Services

- Primary MEDITECH instance
- Historical MEDITECH instance
- Disaster recovery

Meaningful Use regulations and requirements have become increasingly complex to understand, and challenging to implement. Member facilities are supported through successful implementations, attestation, and ONC audits.

Meaningful Use Implementation Approach: RAPID

- Review of Certified Program Status
- Analysis using the Engage Meaningful Use Gap Toolkit
- Planning MEDITECH implementations securing ARRA regulatory components and timelines
- Implementation Assistance/Assessment with access to the Engage WebBased Daily Dashboard and monthly report cards
- Documentation for registration, attestation, and audits
