

Healthcare staffing solutions

Medefis

California Critical Access Hospital Network partners with **Medefis** to provide a solution to healthcare facilities for managing every aspect of their staffing needs. The Medefis Vendor Management System (VMS) offers a simple, easy-to-use technology solution. This on-demand, web-based system allows members to simply post staffing needs, and within minutes their network of over 600 pre-approved staffing organizations will begin submitting qualified candidates for consideration.

Medefis averages a 98% fill rate for all jobs posted.

Members are able to securely access the Medefis platform from any computer to manage all interactions with staffing vendors. The Medefis VMS eliminates the need to communicate with multiple agencies using traditional methods such as phone, fax, email, and on average, reduces the number of staffing agency solicitation calls by over 90 percent.

Medefis offers the following positions to healthcare facilities:

- Accounting
- Advanced Practice
- Allied Health
- Cardiopulmonary
- Clerical
- Diagnostic Imaging
- Food Service
- Health Sciences
- Information Technology
- Janitorial
- Light Industrial
- Management
- Medical Coding
- Medical Filing & Records Management
- Medical Laboratory
- Nursing
- Pharmacy
- Physicians
- Radiation Oncology
- Rehabilitation Therapy Home Health
- Rehabilitation Therapy Inpatient
- Rehabilitation Therapy Long-term Care
- Rehabilitation Therapy Outpatient
- Security

Benefits to members:

- Unlimited free job postings to the nation's largest network of staffing agencies
- Market-driven pricing through the BidMatch technology ensuring market rates for temporary staff
- First-rate candidate sourcing through the TalentMatch technology which evaluates and scores each candidate in relation to specific job requirements
- A dedicated account manager will assist with all staffing inquiries and maintain a relationship with vendors
- 24/7/365 on demand access to the VMS platform

**Working together to strengthen
the health of our communities**
