How to Interpret this Report

This report contains provider-level data from the Hospital Strength Index™, a broad performance scorecard based on publicly available data. For each facility appearing in the table above, **Percentile Ranks** measure relative strength related to, and aggregated from, performance in eight pillars relating to three categories: **Market, Value-Based, and Financial**. Percentile scores reflect pillar-level performance of a given hospital or hospital cohort to all U.S. hospitals included in the study. Circles next to the score are conditionally formatted by quartile. Blanks indicate that data was not available.
